1.0 RFP BRIEF

The purpose of this project is to consolidate and modernize 11 data centers into 5 strategically located centers. This consolidation will reduce operational complexity, enhance data security, and improve system performance while achieving cost efficiencies and business agility. The project will include but not limited to upgrade of obsolete infrastructure (servers and storage), projected growth capacity, integrating existing systems, deploying new capabilities, and ensuring the seamless migration of applications and data to the newly consolidated data centers. The streamlined infrastructure will optimize resource utilization, enhance disaster recovery capabilities, and provide a scalable, resilient foundation to meet Debswana's future business demands, aligning its technology infrastructure with strategic objectives for sustainable and innovative mining operations
